ANSYS Embedded Dielectric Layers

The diagram shows a cross-section of a dielectric layer with three embedded dielectric layers. The top layer is labeled 'Dielectric Layer' and the three embedded layers are labeled 'Embedded Dielectric Layers'. The embedded layers are shown in different colors: blue, purple, and cyan.

The screenshot shows the ANSYS software interface with a tree view on the left and a main workspace on the right. The tree view shows a hierarchy of objects, including a 'Dielectric Layer' and several 'Embedded Dielectric Layers'. The main workspace shows a 3D model of the dielectric layer with the embedded layers.

For embedded dielectric layer(s):

- 1) Uncheck "Laminar mode"
- 2) Define embedded layer(s) as signal layer(s)
- 3) Turn on "Solve inside" option for HFSS
