

NI's LabVIEW and FLEXIBLE HARDWARE BENEFITS

Flexible Open Software

- ▶ One graphical programming approach for Windows, Real-Time, FPGA, Prototypes, Embedded, Distributed & Control Design
- Reduces Cost
- Shortens Time to Market
- ▶ Interfaces with Simulink and MATRIXx SystemBuild for Design and Simulation

Flexible Open Hardware

- ▶ Variety of Platforms, Mix and Match
- ▶ Based on open architectures (PCI,PXI,etc)
- ▶ Tools for Design (HIL) and for Production Test
